

## Compact Tactical Communication Jammer

- > The ENA-7020 Compact Tactical Communication Jammer is a miniature airborne, naval, or ground stand-in communication jammer that utilizes IAI-ELTA's propriety inverse gain techniques.

The system effectively jams enemy radio and communication in a designated area with minimum to no interference to own-force communication and COMINT activities.

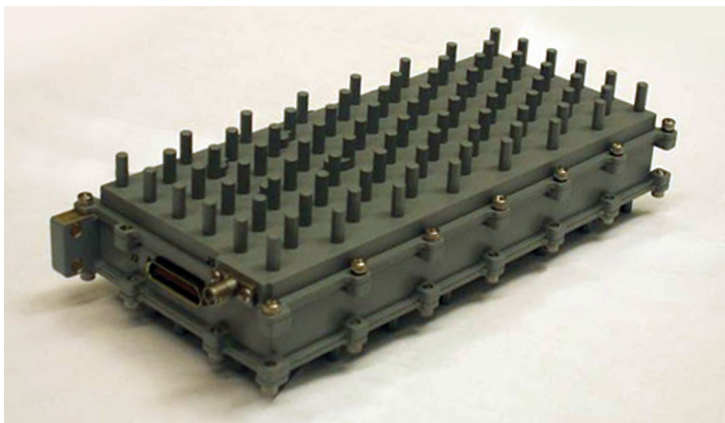

ECM & EW

# Features

- Manual preset spectral jamming
- Direct transponder jamming
- Multi-channel jamming
- Manual and preset control of operation
- Wideband exciter
- The system can be installed on various platforms such as:
  - Ground vehicles
  - Airborne vehicles (including mini & tactical UAV)
  - Unmanned Surface Vehicles (USV)
